### Objective

*Seeking a fully remote software development position, using React as the framework, preferably with Git for version control and Node for the back-end.*

### Work Experience

#### *Front-end Software Developer*

3/2018 – 4/2025 | RWS Life Sciences, Wakefield, MA

- Development and architecture for software used by project managers to track medical translations into multiple languages.
- Managing a local anonymized MySQL database which mirrors Production and running migrations.
- Troubleshooting and debugging older code, while working to replace it with modern code.
- Updating legacy code to modern structures using React, Node and other JavaScript resources.
- Version control using Git.
- Compiling JavaScript and CSS with Webpack.
- Tracking work with ticketing software such as Jira and Azure.

#### *Front-end Web Developer*

6/2013 – 3/2018 | Auto Europe, Portland, ME

- Javascript and CSS architecture, using version control and Gulp for bundling.
- UI development and design.
- Customized use of various JavaScript libraries for complex site data.
- Troubleshooting and debugging of legacy code.
- JavaScript and ColdFusion Development for the Mura CMS.

#### *Front-end Web Developer*

2/2012 – 11/2012 | Country Home Products, Vergennes, VT

- Maintenance and development for the company's website. Since most of our customers are older users, all JavaScript and CSS needed to be workable in pre-9 versions of Internet Explorer.

#### *Front-end Web Developer*

2/2011 – 2/2012 | Colonial Life, Columbia, SC

- Ongoing development for the pre-existing intranet and the new CMS.
- Front-end Development for the new Sitecore CMS to be launched in 2012, including jQuery solutions and XSLT renderings for the CMS.

#### *Graphic Designer, Content Administrator, Candy Photographer*

6/2010 – 2/2011 | Candy.com, Weymouth, MA

- Performed content editing and maintenance for the company CMS.
- Designed marketing materials, designed and launched HTML mass emails to subscribers.
- Photographed candy products for use in the company's online store.

#### *Web Consultant*

1/2010 – 5/2010 | Spin 350, Boston, MA

- Migrated BIDMC's internal site to a new Sitecore CMS.
- Extensive HTML work was performed to restructure the old content to fit the new design.
- Managed content through the Sitecore, and through Sitecore's Media Library.

## **Skills**

### *Web Applications and Code*

- JavaScript
- React
- TypeScript
- Git
- Webpack
- Vite
- Markdown
- HTML, CSS, Sass/LESS
- Node JS
- MySQL
- Microsoft Office

## **Education**

### *Self-Education*

1998- Present

- Like most web developers, most of my skills are self-taught. It's important to keep an eye on where the technology is going.

### *Courses Taken to Update Skills*

1/2004 - 1/2007, Trident Technical College, North Charleston, SC

- Various courses taken in web programming and visual design. They didn't have a web development program, but they did offer some design classes and one or two programming classes.

### *Associate Degree in Commercial Graphics*

12/1998, Midlands Technical College, Columbia, SC

- I was trained to run a printing press as well as design for one. Print and Web are total opposites in some ways, but they do have some overlap.
